

COMMERCEWORX

CUSTOMER FOCUSED • SOLUTION DRIVEN™

The Need for the Internet

In industry after industry, the Internet is fast becoming the network of choice for B2B communications of mission-critical data such as purchase orders, invoices and Advance Ship Notices.

Industry influencers in retail, finance, healthcare and manufacturing have either mandated or requested their suppliers to participate in this migration to the Internet. In this demanding and cost-focused business climate, this is particularly wise since it gives the company a number of important advantages.

CWX*AS2 Hosting Service

Our offering was conceived and designed to provide AS2 capabilities at reduced costs for suppliers who sell to retailers that have mandated AS2. Our objective is to enable a client rapidly without change to their current infrastructure.

The Need for Quality

Secure and reliable transport of business documents through firewalls, around network outages and via predetermined fail-over networks using standard implementations of FTP, and AS1 that forms the foundation of the COMMERCEWorx*AS2 Client Software. Certified to be AS2 OEM interoperable by Drummond Group (Testing organization for the Uniform Code Council (UCC).

"For users not interested in implementing and deploying their own EDI INT AS2 solution, outsourcing to a service provider is an option. At higher volumes, the costs associated with outsourcing may

exceed those of an in-house solution, but outsourcing will reduce the risks associated with failed connectivity between you and the hub."

The Need for Speed

COMMERCEWorx*AS2 Client Software is pre-configured for your partner network(s), so you can begin to function right after downloading from our Implementation Site.

Graphical User Interfaces(GUI) are great for the casual Windows user, but when the Client needs to be tightly integrated with the application creating or interacting with the responses, the use of a command line interface, DLL or shared library can automate the transport service on a schedule or as part of a larger and faster business process.

The Need for Scalability

COMMERCEWorx*AS2 Client Software is an integral part of the COMMERCEWorx portfolio. It is designed to inter-operate with:

- C2000 ASN Solution
- C3000i Internet ASN Solution
- Various Translation Products

No other software vendor can offer the end to end solution that we offer. From data integration, Advance Ship Notice creation, label production and AS2 communication, COMMERCEWorx Inc. is your one stop solution.

Whether you are using traditional EDI VANs or have been issued a mandate to convert to AS1, AS2, Secure FTP or XML... COMMERCEWorx can help take you there.

COMMERCEWorx distinguishes itself by focusing on the ASN compliance label solution over various platforms. We are proud of the reputation we have built in the industry.

- Drummond Group OEM Certified
- Secure Internet Communications
- Rapid deployment and rollout
- Integration to any EDI translator

- Supports multiple data types, protocols, and security standards over the internet
- Not dependant on a static IP or having a computer running 24/7
